

J. safeguard

Just makes sense to drive without worries.

FOR STRESS-FREE DRIVING

J. safeguard 24 months / 40 000 km

999 € (incl. VAT 24 %)

Can be admitted to used cars with a model year of seven years or less from the admission date.

On the condition, that the vehicle in question has been driven less than 200 000 km and has cubic volume of less than 3 200 cm³.

J. safeguard 12 months / 20 000 km

599 € (incl. VAT 24 %)

Can be admitted to used cars with a model year of nine years or less from the admission date.

On the condition, that the vehicle in question has been driven less than 200 000 km and has cubic volume of less than 3 200 cm³.

This is what the J. safeguard covers:

EQUIPMENT

(Only factory installed equipment)

Audio components (doesn't concern speaker/integrated GPS-system), radio antennas, immobiliser, cruise control switches and radar, central unit of an air conditioner or heating, instrument cluster, level control sensors and restrictor valves, level control compressors, engines or transmission of adjustable seats, seat adjustment switches, power control or engines of openable roofs and sunroofs, sunroof motors and switches (does not include sunroof rails or curtains), boot lid switches or engines, switches and motor of electric windows, fuel-based additional heater, lift-mechanisms of electric windows. Sealants and insulation in a case, when the forementioned parts are being replaced.

SAFETY EQUIPMENT

Airbags, impact sensors, airbag wires (not connectors/oxidation), steering pillar contact roller.

ENGINE

The following lubricated parts within the engine: camshaft and bearings, connecting rods and bearings, crankshaft and head bearings, oil pump, push rods and lifters, pistons, piston rings and pins, swing arms and bushings, valve springs, valve guides, and valve chucks (not guide gaskets), exhaust manifold, oil pipes, belt pulleys, oil pan, timing gear belt/chain, sprockets, and tensioner. Covers, housings, engine block, and cylinder heads are only included in J. safeguard if they are damaged due to an internally lubricated part breaking. Insulations and gaskets only if the above car parts are replaced.

GEARING

Automatic, manual, or transfer gearbox: all internal lubricated parts within the transmission (not the clutch), cooling pipes (metal), fasteners, torque transformer, flywheel, oil pan. Gear or transfer gearbox, insulations, gaskets, and oil only if the transmission is dismantled due to an above part breaking.

TRANSMISSION

All lubricated parts within the drive shaft assembly, axles and differential joints, rubber covers, drive shaft housing, drive shaft support, differential gear housing, front hub traction locks, drive shaft, universal joints. Insulations and gaskets only if the above car parts are replaced.

TURBO

Supercharger/turbocharger housing, internal lubricated parts, oil pipes, fasteners. Insulations and gaskets only if the above car parts are replaced.

AIR CONDITIONING

Compressor, magnetic switch, belt pulley assembly, thermostatic expansion valve, compressor cut-off switch, pressure switch. Air conditioning pipes/hoses, coolant, insulations and gaskets only if the above car parts are replaced.

BRAKES

Main cylinder, vacuum booster, loading valve, hydraulic brake pipes and fasteners, hydraulic and electronic control unit, brake booster, wheel speed sensors, hydraulic pump/motor assembly, pressure converter valve. Insulations and gaskets only if the above car parts are replaced.

COOLING SYSTEM

Water pump, cooling fan motor, engine radiator cell, heater cell and motor, thermostat, coolant temperature feeler. Insulations and gaskets only if the above car parts are replaced.

ELECTRICAL COMPONENTS

Charger, instrument cluster backlight switch, ignition coil, engine wire set, engine control unit, internal and external gearbox control unit, transmission control unit, exhaust gas recirculation (EGR) valve, starter motor, the following electronic switches, used either manually or mechanically: brake light switch, rear window heater switch, headlight switch, ignition switch, steering lock, powered mirror switch and motor, indicator switch, washer pump switch, wiper switch, washer pump motor (not headlight washer), and washer motor. Insulations and gaskets only if the above car parts are replaced.

SENSORS

Oil pressure sensor, temperature sensor, camshaft position feeler, crankshaft position feeler, lambda sensor, nox sensor, oil level sensor, air mass sensor, intake manifold pressure feeler, gas pedal position feeler, boost pressure feeler, pressure differential feeler. Insulations and gaskets only if the above car parts are replaced.

FUEL SYSTEM

(engine control)

Intake manifold, fuel pump, fuel distributor, pipes (metal), pressure adjuster, fuel tank, fuel tank filling pipe, throttle body, heating adjuster, additional vacuum pump, and injection pump. Insulations and gaskets only if the above car parts are replaced.

STEERING

All lubricated parts within the steering gear and power steering pump, electronic power steering, power steering hoses and connections, steering shaft, steering gear, steering wheel adjusting mechanism. Insulations and gaskets only if the above car parts are replaced.

E-HYBRID / ELECTRICITY

Electric engine, electric engine's speed control, electric engine's control unit and air-source heat pump's compressor. Insulations and gaskets only if the above car parts are replaced.

J. safeguard covers a breakage of all previously listed parts.

IN CASE OF A SUDDEN BREAKAGE OF A VEHICLE PLEASE DO THE FOLLOWING:

When you are in a need of repair for your vehicle, that is due to a breakage of a part or component included in the list of components being compensated by the J. safeguard program, call the phone number listed underneath, or show a proof of your safeguard deal at the repair shop. Compensation applications are approved by phone, so that your car would be in working order as fast as possible.

J. safeguard customer service

(On weekdays, mon–fri 9–16)

010 616 8080

J. safeguard program does not cover the following parts:

J. safeguard compensation limit max 5000 €.

Conditions of the safeguard program FinnTakuu Oy.
Service provider FinnTakuu Oy.

- Scheduled maintenances
- Software updated and adjustments
- Springs and shock absorbers
- Wheel bearing
- Support arms
- Exhaust pipes
- Catalyst and particle filter
- Wiring harness
- Sealants and insulation
- Clutch
- Rubber bushings
- Nozzle and pump nozzle
- Keys
- Parking aid
- Batteries
